1 Introduction

The Mity Banner module will show one of the following:

- Fill Article Image
- Intro Image
- Category Image (for Category blog menu item)

If none of the above images are found you have the option in the module to set a default image to show, or select a folder of images from which the module will show a random image.

Article/Category images take precedence, then the default image then the random image.

2 Install the Module

Install the module by selecting the **Extensions** menu, **Manage** then **Install**.

Browse for the file mod_mitybanner.zip or drag it onto the browser to install.

3 Module Settings

From the **Module Manager** edit the Mity Banner module.

▼

Title: The title of your module – it can be anything you like.

Article Image: Select to show either the Fill Image or Intro Image from the article.

Default Image: Select an image to show if no article or category image is shown.

Default / Random Image Alt: Alt Tag attribute for the default or random image. Alt Tags for the Articles or Category come from the respective article or category.

Random Image Folder: Select a folder of images where the module will select the random image from. Note this folder must be within your /images/ folder.

You can also set the **Module Class Suffix** – found under the **Advanced** tab.
