## 1 Introduction

The Mity File List module will show a list of files from a specified directory. It will (optionally) recursively show files in sub-directories also.

For example, if your folder structure is:

Newsletters

- January
- February
- March

The module will show:

### January

- File name
- File Name
- File Name

### February

- File name
- File Name
- File Name

### March

- File name
- File Name
- File Name

## 2 Install the Module

Install the module by selecting the **Extensions** menu, **Manage** then **Install**.

Browse for the file mod\_mity\_file\_mist.zip or drag it onto the browser to install.

## 3 Module Settings

From the **Module Manager** edit the Mity File List module.

Title \*

Module [Menu Assignment](#) [Advanced](#) [Permissions](#)

### Mity File List

Site

A module to generate a list of files in a given directory.

Folder location \*

Recursive folders?  Yes  No

Sort by \*  ▼

Sort order \*  ▼

**Title:** The title of your module – it can be anything you like.

**Folder Location:** Path to your folder.

**Recursive Folders:** Whether or not you want to show folders/files recursively.

**Sort By:** Sort by file name or modified date.

**Sort Order:** Sort your files in an Ascending or Descending order.

You can also set the **Module Class Suffix** – found under the **Advanced** tab.
